Experience

Yandex.Practicum

Jan 2022 — Nov 2022

Front-end developer (student)

During studying, I've implemented the following projects:

- **Search film service,** client and server parts are been made:
  - displaying film list by keyword
  - saving chosen films in the Favourite page on back-end side
  - saving search filters and page state on the browser side
  - mounting on page different components for authorized/unauthorized users

Stack: JS, HTML, CSS, React.js, MongoDB, Express.js, Joi, Celebrate, Formik

https://roman.diploma.nomoredomains.icu

- **Mesto**
  Simplified Instagram analog, implemented adding and deleting images, registration and authorization via JWT cookie, changing user information, popup windows with dimming, and forms validation.

Stack: JS, HTML, CSS, React.js, ESLint, Webpack, Git

https://romanriyanov.github.io/react-mesto-auth

- **Landing 'Traveling in Russia'**
  The one-page site that supports adaptive change of display in conformity with media queries.

Stack: JS, HTML, CSS, flex-layout, grid-layout, responsive design

https://romanriyanov.github.io/russian-travel-look/index.html

All projects passed code review and been accepted only if according to the technical task.

UEC UEC-UMPO

Sep 2016 — Jul 2022

Engineer

- Carried out maintenance of the life cycle of aviation engines: producing, technical maintenance, searching and fixing malfunctions, repair and decommissioning.

- Represents interests of the production factory at operators: duties included communication with domestic and foreign customers, resolution of disputes, guarantee presentations, and claim work.

- Traveled on business trips by tech brigade chief. Took part in the commissioning of experimental technic. Have gratitude and encouragement.

Education

About me

Successfully worked as an aeronautical engineer, but exhausted all growth opportunities. Changed qualification to developer: front-end attracts me to wide spectrum of usage and tangible results of my work.

During my time hitchhiked from Saint - Petersburg to Barcelona and from Vladivostok to Tomsk.
